VisionLite Screening Report

Date: 2026-11-11 Customer: Asha Kumari

We suggest an eye exam

- Last eye exam was long ago

Eye results

Right eye	6/18 (logMAR 0.5)
Left eye	6/15 (logMAR 0.4)
Near	6/24 (logMAR 0.6)
Astigmatism hint	Possible
Colour hint	Possible

Possible astigmatism. An eye doctor must measure it.

Some answers differed. This is only a hint. Screens vary.

Lens suggestion

Progressive or bifocal lenses

- Distance chart was below 6/9
- Near reading was weak

Rough power range

Right eye: -1.00 ~ -2.00
Left eye: -1.00 ~ -2.00
Reading add: +2.25 ~ +2.75

This is a rough range, not a prescription.

Coatings

- Anti glare: Trouble at night
- Blue light filter: Long screen time (Optional comfort filter. Evidence that it protects eye health is limited.)

Frame

Pupil distance: 62.5 mm Frame size: Medium

VisionLite is a screening and recommendation tool. It does not diagnose, and it does not replace an eye doctor.
